### Ready-to-Run E-Procurement for SAP ERP customers

Relieve your shopping department and reduce your costs at the same time

Did you sometimes asked yourself the following questions?

- ❖ How can we provide our shopping department more time for strategic tasks?
- ❖ How can we speed up the order process and reduce the costs the same time?
- ❖ Are the whole forms and paperwork really necessary?
- ❖ Why does the approval process takes us always so much time?

WECO E-Procurement is the answer to your questions!

We offer you with WECO E-Procurement a powerful and proven SAP add-on which supports you by realizing your company's targets. The e-procurement is especially suitable for c-parts and maintenance, operation and repair goods (MRO), because there is an unprofitable proportion between process costs and order value. With pre-defined templates we can secure a short introduction time, within a few days. After a short time our product amortized itself and your shopping department is relieved.

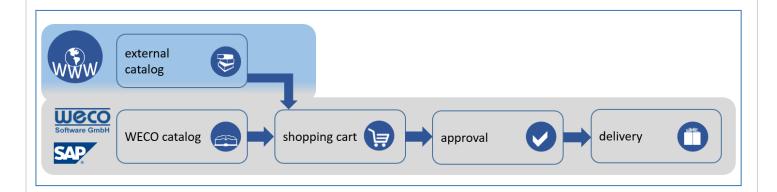

How WECO E-Procurement is working?

You are using WECO catalogs to create your internal catalogs and so you can realize your buying-right-lines. The catalog management can take place without special technical know-how, it takes place via excel upload. SAP and non-SAP materials can be shown like product variants and graduated prices. Use configurable products for the order of complex products like work clothes.

WECO E-Commerce™

Procurement

weco Software GmbH

Ready-to-Run E-Procurement for SAP ERP customers

The finding of products is very easy with full text or faceted search. A mixed operation between internal and external catalogs is also troubles realizable. Via customizing you can easily connect online catalogs and portals of your deliverer to WECO E-Procurement, so that your employees can use it. The data transfer to your shopping cart is happening with open catalog interfaces (OCI), which is used by nearly every catalog system today.

Supported catalog formats

- SAP OCI (Open Catalog Interface)
- cXML (commerce eXtensible Markup Language)

Catalog selection

You can provide your employees all needed catalogs in a clear surface, it does not matter if internal or external, so that the finding of the right catalog is optimal supported.

Flexible procurement types

In the standard software are the procurement types order, ordering requirement, material reservation and goods movement supported. Of course it is also possible to mix different procurement types in one shopping cart. Customer own procurement types can be integrated modification free via customizing.

Integrated workflows

Approval process can be made directly at the browser in a personalized workflow entrance.

Compelling technique

WECO E-Commerce is a SAP certified add-on product to SAP-ERP and is fully developed with proven SAP tools. Therefor is no investment in to additional hardware needed.

SAP integration

The access to all ERP data is happening in real time via the SAP released function. What guarantees an absolute data consistence and actuality – completely interface-free. The effort for the ongoing operation is therefor reduced to a minimum.
